

Professional Development: FDPs, Conferences & Refresher Courses

1. Purpose

The purpose of this policy is to promote continuous professional development of faculty and staff by encouraging participation in Faculty Development Programmes (FDPs), Conferences, Workshops, Seminars, and Refresher Courses to enhance academic quality, research output, and institutional excellence.

2. Scope & Applicability

This policy applies to: - Teaching Staff - Research Staff - Academic Administrators - Technical Staff (where applicable)

3. Objectives

- To update subject knowledge and pedagogical skills
- To promote research, innovation, and collaboration
- To improve teaching-learning processes
- To align faculty competencies with emerging technologies and industry needs

4. Types of Professional Development Activities

Professional development activities include but are not limited to: - Faculty Development Programmes (FDPs) - Orientation Programmes - Refresher Courses (UGC/AICTE recognized) - National / International Conferences - Seminars, Workshops, and Symposiums - Short-Term Training Programmes (STTPs) - MOOCs, SWAYAM, NPTEL certification courses

5. Participation in External Programmes (Attended)

- Faculty members are encouraged to attend recognized FDPs, conferences, and refresher courses.
- Prior permission from the competent authority is mandatory.
- Programmes conducted by UGC, AICTE, Government bodies, reputed universities, IITs, NITs, or professional bodies shall be given preference.
- Attendance certificates and reports must be submitted after completion.

6. Organization of Programmes (Organized)

- Faculty members are encouraged to organize FDPs, workshops, seminars, and conferences at the institutional level.

- Such programmes shall be conducted with prior approval from the Management / Head of Institution.
- Programmes may be organized in collaboration with universities, professional bodies, or industry.
- Proper documentation including brochure, attendance, photographs, and reports must be maintained.

7. Financial Support & Leave

- Financial assistance, registration fee reimbursement, and duty leave may be granted as per institutional norms.
- Sanction of support depends on the relevance of the programme and budget availability.

8. Recognition & Incentives

- Participation and organization of professional development activities shall be considered during performance appraisal, promotions, and career advancement schemes.
- Certificates and achievements shall be recorded in the service register / faculty profile.

9. Reporting & Documentation

Faculty members shall submit: - Copy of invitation / acceptance letter - Attendance or participation certificate - Brief report highlighting outcomes and learnings

10. Responsibilities

- Faculty: Identify relevant programmes and apply through proper channel.
- HOD: Recommend and monitor participation.
- Institution: Facilitate and encourage continuous professional development.

11. Amendments

The institution reserves the right to modify this policy from time to time based on statutory requirements and institutional needs.

12. Effective Date

This policy shall come into effect from the date of approval by the Competent Authority.

Approved by the Management / Governing Body

FDP Brochure

Schedule:

Day 1-3: Introduction to Java with React JS

- Java Basics Recap: Object-Oriented Programming (OOP) concepts, classes, objects, inheritance, and polymorphism.
- React JS Overview: Introduction to React components, JSX, props, and state.
- Setting Up Environment: Install JDK, Node.js, and create a basic React app.

Day 4-6: Java with Spring Boot & REST APIs

- Spring Boot Setup: Introduction to Spring Boot, creating your first REST API.
- Connecting with React: Fetching data from Java Spring Boot APIs in React.
- State Management in React: Using Context API and Hooks.

Day 7-9: Advanced Java Features & AI Introduction

- Java Advanced Concepts: Streams, Lambda expressions, and multithreading.
- AI Basics: Introduction to AI, Machine Learning (ML), and their significance in web development.
- Integrating AI APIs: Using AI/ML APIs in Java (e.g., TensorFlow, Google AI APIs).

Day 10-12: React JS with AI Integration

- React with AI: Integrating AI libraries in React (e.g., TensorFlow.js).
- Real-time AI in React: Implementing basic AI tasks like image recognition or NLP in React.
- UI/UX for AI Applications: Designing user interfaces for AI-powered applications.

Day 13-15: Project Implementation

- Java-React AI Project: Develop a full-stack AI-powered application, combining Java (Spring Boot) with React and AI features.
- Testing and Debugging: Unit testing in Java, React testing with Jest, and AI model validation.
- Deployment: Deploying the full-stack AI application using Docker or cloud services.

1. Introduction

The **Java Full Stack with React JS & AI** Faculty Development Program was conducted from **2nd December 2024 to 22nd December 2024**. This program aimed to enhance faculty members' technical skills in emerging areas of web development and Artificial Intelligence (AI). The course provided hands-on experience in Java Full Stack Development, React JS, and the integration of AI technologies, equipping faculty with the necessary tools to better integrate these concepts into their teaching curriculum.

The program also sought to foster a collaborative environment where faculty could share knowledge and experiences related to modern software development practices.

2. Objectives of Faculty Development Program

- Equip faculty with expertise in Java Full Stack Development, React JS, and AI.
- Develop practical knowledge of integrating AI capabilities into web applications.
- Enhance faculty's ability to teach the latest technologies and incorporate them into their courses.
- Encourage faculty to stay updated with current industry trends and advancements in web development and AI.
- Foster collaboration among faculty members from various departments, facilitating interdisciplinary learning.

3. Faculty Development Program Details

- **Program Duration:** 2nd December 2024 to 22nd December 2024
- **Mode of Delivery:** Online
- **Number of Participants:** 78
- **Target Audience:** Faculty members from the Computer Science, Information Technology, and related departments.

Module Breakdown

1. Introduction to Full Stack Development

- Overview of Full Stack Development and its significance in modern applications.
- Introduction to backend development using Java (Spring Boot framework).
- Frontend development using React JS for dynamic web applications.
- Integrating Java backend with React JS frontend.

2. React JS Deep Dive

- Detailed exploration of React components, hooks, and state management.
- Building user interfaces with reusable components.
- Hands-on sessions with React JS libraries and tools.

3. Artificial Intelligence in Web Development

- Introduction to AI concepts, including machine learning and neural networks.
- Practical implementation of AI algorithms in web applications (e.g., recommendation systems, AI-driven chatbots).
- Using AI libraries with Java and React JS to add intelligent features.

4. Project Development

- Participants worked on real-world projects that combined Java Full Stack and AI technologies.
- Emphasis on team-based learning and collaborative problem-solving.
- Mentorship sessions for project guidance.

4. Impact of Faculty Development Program

- **Improvement in Teaching Competencies:** Faculty members have reported a significant improvement in their confidence and competency in teaching Java Full Stack development, React JS, and AI. They are now more equipped to integrate these technologies into their courses and offer students relevant, up-to-date content.
- **Increased Engagement with Industry Trends:** The program helped faculty stay abreast of current industry trends in web development and AI, enabling them to bring in real-world examples into the classroom.
- **Positive Feedback on Hands-On Approach:** The interactive, hands-on nature of the course was highly appreciated. Participants found the practical sessions particularly valuable for reinforcing theoretical concepts.
- **Collaboration and Networking:** The program encouraged networking between faculty from various departments, creating opportunities for collaboration on interdisciplinary projects that combine AI, web development, and other technologies.
- **Project Outcomes:** The final projects developed by participants featured innovative applications of AI within full stack environments. These projects will serve as models for future student projects and could be incorporated into the curriculum.

5. Challenges Faced

- **Time Constraints:** Due to the extensive nature of the program, some faculty members expressed difficulty in balancing their existing workload with the program schedule.
- **Technical Challenges:** Some participants faced challenges with setting up the development environments for Java, React JS, and AI tools.
- **Pace of Content Delivery:** A few faculty members found the pace of advanced topics in AI to be slightly fast. More focused sessions could have been beneficial.

6. Future Goals and Plans

- Follow-Up Sessions:** Organize refresher workshops and advanced sessions to address areas where faculty required further support, particularly in AI and advanced JavaScript techniques.
- Collaborative Projects:** Encourage faculty members to integrate the skills learned during the program into cross-disciplinary projects with students and other faculty members.
- Online Resources:** Develop and provide faculty with access to a dedicated portal or resource center with recorded lectures, reading materials, and tools used during the program.
- Regular Industry Interactions:** Invite industry experts to conduct guest lectures and webinars to keep faculty updated on the latest developments in web development and AI technologies.

1. Introduction

The One Day Professional Development Program on "Introduction to Machine Learning for Cyber Security" was organized to provide a comprehensive understanding of how machine learning (ML) techniques are being applied to enhance the security landscape in the digital age. As cyber threats grow increasingly sophisticated, the application of machine learning in cybersecurity is a cutting-edge solution to enhance threat detection, response, and prevention mechanisms.

The event aimed at equipping professionals with the foundational knowledge required to integrate machine learning concepts into their cybersecurity practices.

2. Objectives of the Program

The primary objectives of the program were as follows:

- To introduce the concept of machine learning and its importance in the field of cybersecurity.
- To explain various machine learning algorithms and their applications in threat detection and risk management.
- To discuss real-world case studies where machine learning has significantly improved cybersecurity protocols.
- To provide hands-on experience in applying machine learning algorithms to cybersecurity problems.
- To foster collaboration among professionals, enhancing knowledge sharing and networking.

3. Key Topics Covered

Session 1: Introduction to Machine Learning

Speaker: Sir Mohit Tiwari, Assistant Professor, BVCE Delhi.

Overview: The session provided a foundational understanding of machine learning, including definitions, history, and types of machine learning—supervised, unsupervised, and reinforcement learning. The speaker highlighted the growing relevance of machine learning in solving complex problems, particularly in the cybersecurity domain.

Machine Learning Algorithms in Cyber Security

- **Overview:** This session focused on different ML algorithms such as decision trees, k-nearest neighbors (KNN), support vector machines (SVM), and neural networks. The focus was on how these algorithms are used for anomaly

detection, malware analysis, intrusion detection systems (IDS), and phishing attack detection.

Real-World Applications of Machine Learning in Cyber Security

- **Overview:** In this session, the speaker discussed case studies where ML techniques were successfully implemented in real-world cybersecurity scenarios. Examples included:
 - Automated malware detection using deep learning models.
 - Predictive analytics for identifying vulnerabilities before they are exploited.
 - Behavioral analysis to detect insider threats or unusual activities.

Challenges in Machine Learning for Cyber Security

- **Overview:** This session addressed the limitations and challenges faced when integrating machine learning into cybersecurity practices, including issues related to data quality, model interpretability, adversarial attacks, and real-time processing.

4. Key Takeaways

- **Machine Learning's Impact on Cybersecurity:** Machine learning is crucial for detecting emerging threats, automating threat responses, and improving overall system security.
- **Hands-On Experience:** Participants gained practical exposure to applying machine learning algorithms to real-world cybersecurity problems.
- **Emerging Trends:** The integration of artificial intelligence (AI) and machine learning is rapidly evolving, with future trends pointing towards more intelligent, adaptive systems capable of handling dynamic threats.
- **Networking:** The event provided an excellent opportunity for professionals from diverse backgrounds to interact, share ideas, and discuss challenges in cybersecurity.

5. Participant Feedback

Feedback from the participants was overwhelmingly positive. Attendees appreciated the well-rounded approach of the program, which combined theoretical knowledge with practical exercises. They found the real-world examples particularly helpful in understanding how machine learning is being applied in modern cybersecurity systems.

Key highlights from the feedback include:

- **Engagement:** Participants appreciated the interactive nature of the sessions.
- **Content Relevance:** Many noted that the content was highly relevant to current trends in the cybersecurity industry.
- **Instructor Expertise:** The instructors were praised for their depth of knowledge and the clarity with which complex topics were explained.

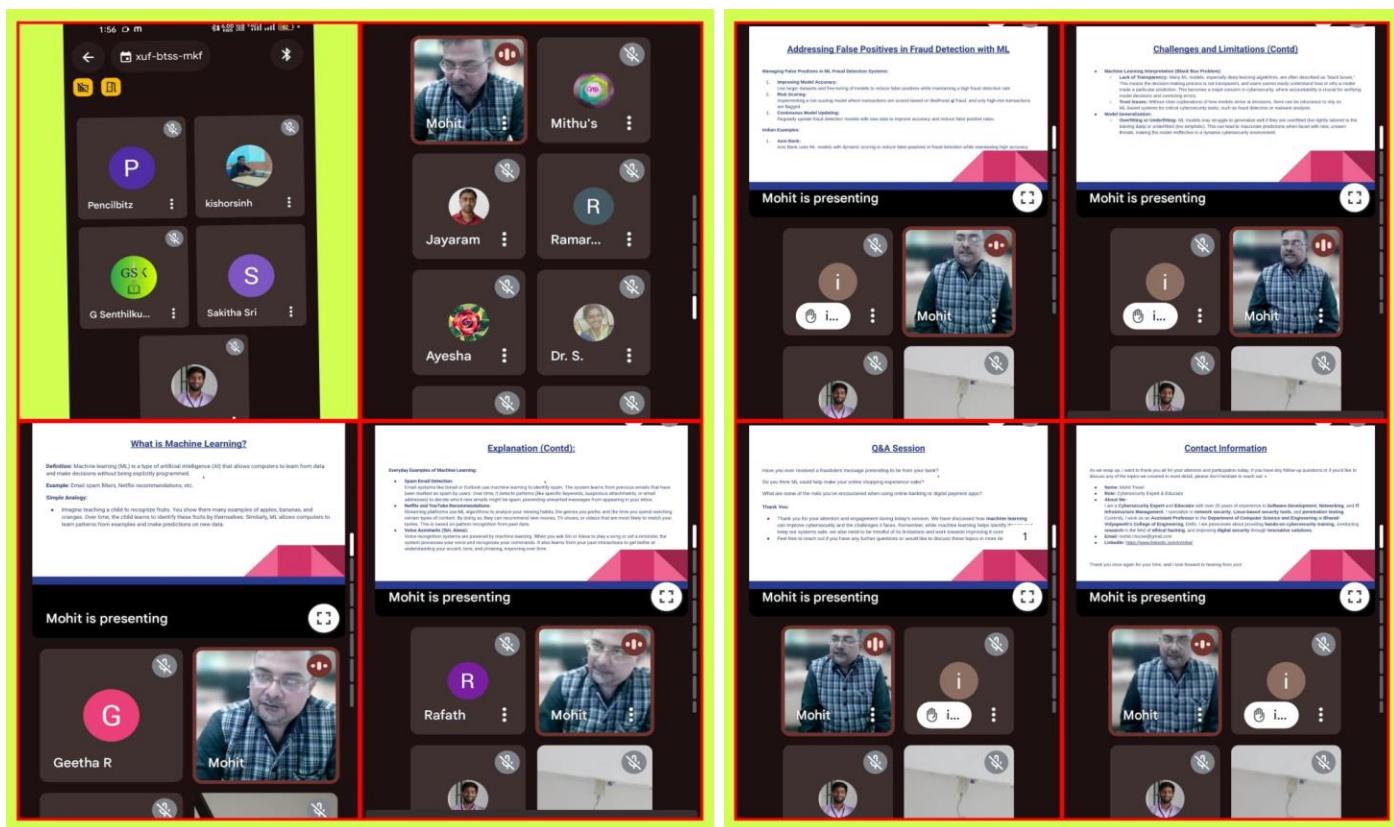

6. Conclusion

The One Day Professional Development Program on "Introduction to Machine Learning for Cyber Security" successfully achieved its objectives by providing participants with valuable insights into the intersection of machine learning and cybersecurity. Attendees left with a stronger understanding of how machine learning can be leveraged to improve security measures and how to begin applying these techniques in their own work.

The event also laid the groundwork for future workshops and training programs on more advanced topics in machine learning and cybersecurity.

workshop Glimpse

Report on National Level Faculty Development Program (FDP) on AI Tools

Organized by Behara College of Engineering and Technology in Collaboration with BrainOVision

Date: 17th Feb 2025 to 21st Feb 2025

Venue: Online Platform Zoom and YouTube

1. Introduction

A National Level Faculty Development Program (FDP) on **AI Tools** was organized by **Behara College of Engineering and Technology**, in collaboration with **BrainOVision**, with the objective of enhancing the skills and knowledge of faculty members in the domain of Artificial Intelligence (AI) and its practical tools. This FDP aimed to equip educators with emerging technological competencies to integrate AI effectively in teaching, research, and innovation.

2. Objectives of the FDP

- To provide in-depth knowledge of the latest AI tools and their applications.
- To enable faculty members to adopt AI-driven solutions in pedagogy.
- To promote research and development activities involving AI in academics.
- To create awareness of real-world AI applications and industry trends.

3. Collaborating Partner: BrainOVision

BrainOVision is a leading EdTech company focusing on bridging the gap between academia and industry by offering advanced training programs, internships, and certifications in cutting-edge technologies such as AI, Machine Learning, IoT, and Data Science.

4. Program Schedule & Topics Covered

The FDP was conducted over [insert duration — e.g., 5 days] and included both theoretical and practical sessions. Experts from academia and industry conducted the sessions on the following topics:

- Introduction to Artificial Intelligence and its Scope
- AI Tools for Teaching and Research
- Natural Language Processing (NLP) Tools
- Computer Vision and Image Processing
- AutoML Platforms (e.g., Google AutoML, Microsoft Azure ML)
- Prompt Engineering and Generative AI (e.g., ChatGPT, Bard)
- Hands-on Workshops with AI Toolkits
- Integration of AI Tools in Curriculum and Assessment
- Ethics in AI and Responsible AI Use

5. Participants

The FDP witnessed active participation from over **84 faculty members** from various institutions across India. Participants represented diverse disciplines including Engineering, Computer Science, Management, and Sciences, showcasing the multidisciplinary interest in AI.

6. Resource Persons

The program was facilitated by industry experts and academic professionals including:

- **N NarayanaSwamy** Senior Technical Head BrainOVision,
- **Pratap Chandra** Data Scientist
- And other eminent speakers

7. Outcomes of the FDP

- Participants gained hands-on experience with several AI tools.
- Faculty members expressed increased confidence in integrating AI into their teaching practices.
- The FDP encouraged interdisciplinary collaborations and research ideas.
- Participants received e-certificates upon successful completion.

8. Feedback and Evaluation

A post-FDP feedback survey indicated a high level of satisfaction among the participants, particularly in terms of content relevance, delivery, and practical exposure. Suggestions were noted for organizing advanced sessions and AI-focused research workshops in the future.

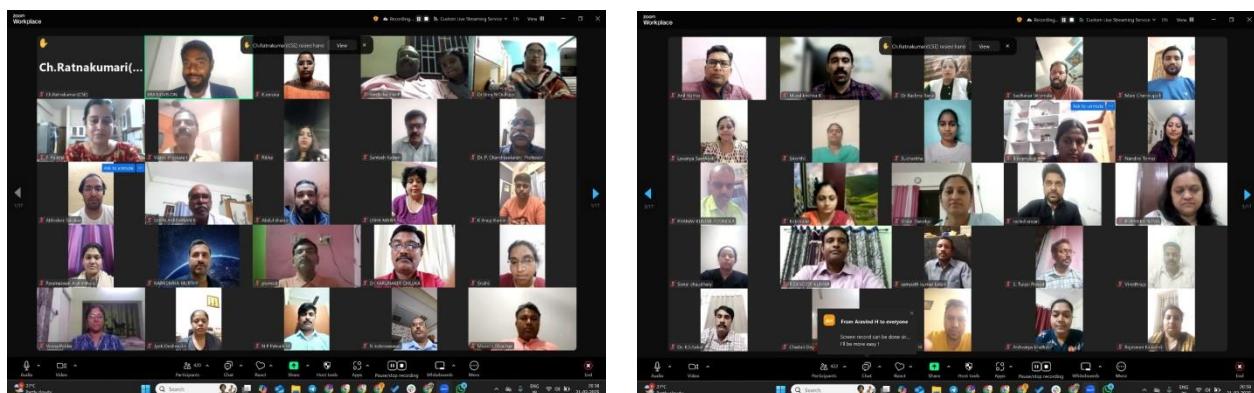

9. Conclusion

The Faculty Development Program on AI Tools, in collaboration with BrainOVision, was a resounding success. It served as a significant step toward empowering faculty with future-ready skills and contributed to the ongoing digital transformation in education. The organizing committee extends heartfelt gratitude to all participants, speakers, and collaborators who made this event possible.

10. Organizing Committee

- **FDP Coordinator:** Mr Chokkpu NarayanaRao
- **Convener:** Dr V Sridhar Patnaik, Principal
- **Organizing Team:** Mrs KSP Keerthi

REPORT ON STUDENT DEVELOPMENT PROGRAM (SDP)

Title: 30-Hour Student Development Program on Digital Marketing

Collaborating Partner: EXCELR

Organized by: Behara College of Engineering and Technology

Duration: 12th Feb 2025 to 5th Mar 2025(2 Hours)

Total Hours: 30 Hours

Venue: Online – Zoom & YouTube

Target Audience: Undergraduate Students (All Disciplines)

1. Introduction

In alignment with the growing demand for digital skills in the current job market, Behara College of Engineering and Technology organized a 30-hour Student Development Program (SDP) on **Digital Marketing**, in collaboration with **EXCELR**, a reputed industry leader in professional training and certification.

This program aimed to enhance students' practical knowledge in digital marketing and empower them with employable skills such as SEO, SEM, content marketing, social media strategy, and data analytics tools related to marketing.

2. Objectives of the Program

- To introduce students to core concepts and tools in Digital Marketing.
- To equip students with hands-on experience in SEO, Google Ads, and social media marketing platforms.
- To build real-time project experience through case studies and live assignments.
- To enhance career readiness and improve employability.

3. Program Structure and Curriculum

Total Duration: 30 Hours (2 Hours/Day for 15Days)

Day	Topics Covered	Methodology
Day 1	Introduction to Digital Marketing, Website Structure, and Basics of HTML	Lecture + Demo
Day 2	Search Engine Optimization (SEO) – On-Page and Off-Page Techniques	Hands-on + Case Study
Day 3	Google Ads (SEM), Display Ads, YouTube Ads	Interactive Workshop
Day 4	Social Media Marketing – Facebook, Instagram, LinkedIn Strategies	Live Campaign Demo
Day 5	Email Marketing, Affiliate Marketing, Influencer Strategy	Group Activity

And so on..

Day 15	Web Analytics (Google Analytics), Project Presentation & Feedback	Project Evaluation
--------	---	--------------------

4. Resource Persons

The sessions were delivered by experienced trainers from **EXCELR**, including:

- **Mr. Mayur** Senior Digital Marketing Trainer
- **Mr B Pradeep Kumar** Subject Matter Expert Digital Marketing Specialist

5. Student Participation

- **Total Participants:** 128
- **Departments Represented:** [e.g., B.Tech BBA, B.Com, BCA, BA, etc.]
- **Attendance Rate:** [90% overall participation]

All students were encouraged to participate in daily assignments, and a mini-project was undertaken as part of the evaluation.

6. Assessment & Certification

Participants were assessed based on:

- Attendance and active participation
- Performance in quizzes and assignments
- Final project presentation

Certificates of Completion were awarded jointly by Behara College of Engineering and Technology and **EXCELR** to students who completed the program requirements.

7. Outcomes and Feedback

- **Improved Technical Skills:** Students developed a strong foundation in digital marketing tools and strategies.
- **Project Exposure:** Teams presented creative marketing plans and ad campaigns.
- **Career Orientation:** Several students expressed interest in pursuing internships and certifications in digital marketing.

Feedback Summary:

- 92% rated the program as “Excellent” or “Very Good”.
- Students appreciated the industry-oriented content and practical approach.

8. Conclusion

The SDP on Digital Marketing proved to be a valuable initiative in preparing students for digital economy careers. The collaboration with **EXCELR** brought industry expertise into the classroom, aligning well with academic and career development goals.

12.30 PM	Ideathon
1.00 PM	Prize Distribution

One day Seminar was conducted on Ideathon at Novotel Hotel on 4th December 2024 by Times of India – Powered by telrop. The faculty and students from Behara College of Engineering Technology (VI) Narava Visakhapatnam has participated in the program has shared some views with the Organizers. One of our faculty members won a prize for innovation in the QUIZ. This one day seminar has given much wider exposer and experience to our students. A team consisting of four students has given a presentation on “Andhra Pradesh’s smaller cities and towns have many tech-savvy individuals skilled in software development, product design & graphic design, but they often lack a dedicated platform to find work. How could we create a marketplace that connects IT freelancers from these areas with potential clients, ensuring local talent finds opportunities without needing to relocate? For this problem statement our students came up with a solution” to compete with nearly 20 teams. Finally our students got participation certificates

Glimpses of One Day Seminar on “Technovate for India: Igniting Ideas, Empowering Futures” held on 4th December 2024.

S. No	Name of Faculty / Member	Type of Contribution	Course / Activity / Membership	Organizing Body / Platform	Duration / Validity	Performance / Status	Contribution to Institution
1	U. Sasirekha	Online Certification	Introduction to Machine Learning	NPTEL – IIT Madras (SWAYAM, MoE)	12 Weeks (Jul–Oct 2025)	55% (Certified)	Strengthens teaching & learning in AI/ML

SYNERGISTIC APPROACHES TO ENHANCE IOT INTRUSION DETECTION: BALANCING FEATURES THROUGH COMBINED LEARNING

Narayananarao C., Mandapati V., Boddu B. Synergistic Approaches to Enhance IoT Intrusion Detection: Balancing Features through Combined Learning.

Abstract. The Internet of Things (IoT) plays a crucial role in ensuring security by preventing unauthorized access, malware infections, and malicious activities. IoT monitors network traffic as well as device behaviour to identify potential threats and take appropriate mitigation measures. However, there is a need for an IoT Intrusion Detection system with enhanced generalization capabilities, leveraging deep learning and advanced anomaly detection techniques. This study presents an innovative approach to IoT IDS that combines SMOTE-Tomek link and BTLBO, CNN with XGB classifier which aims to address data imbalances, improve model performance, reduce misclassifications, and improve overall dataset quality. The proposed IoT IDS system, using the IoT-23 dataset, achieves 99.90% accuracy and a low error rate, all while requiring significantly less execution time. This work represents a significant step forward in IoT security, offering a robust and efficient IDS solution tailored to the changing challenges of the interconnected world.

Keywords: min-max normalization, SMOTE-Tomek Link, BTLBO algorithm, CNN with XGB, Adam Optimizer.

1. Introduction. IoT is a system that connects items that may transfer information without the necessity for interactions between humans and computers, such as computing equipment, automated and digital technologies, objects, animals, and humans. IoT essentially connects the real and virtual worlds. IoT's primary idea is to create a secure, independent link that allows info interchange between actual physical devices and applications [1]. The IoT Analytics study reveals that over 11 billion IoT devices are connected and utilized. Additionally, it is demonstrated the number of devices has increased by more than 10%. It is predicted that over 21 billion linked IoT devices will be worldwide by 2025. Due to general use in several areas and businesses, such as agriculture, transportation, logistics, and healthcare are all examples of smart cities and smart homes, the IoT has seen tremendous growth in recent years [2]. Organisations that use IoT devices in information technology systems have introduced new cybersecurity risks. These new threats call into question fundamental assumptions such as operating ecosystem security, mobility, efficiency, and safety. New danger vectors risk financial and bodily well-being and affect lives' technical components [3, 4].

The ecosystem in which IoT devices are deployed is vulnerable to several threats [5] from outsiders, including hackers, malicious software, and viruses [6]. These hackers' primary objective is to launch assaults

(Jul-Oct 2025)

Roll No: NPTEL25CS91S472402330

Duration of NPTEL course : 12 Weeks

The candidate has studied the above course through MOOCs mode, has submitted online assignments and passed proctored exams. This certificate is therefore acceptable for promotions under CAS as per AICTE notifications dated 16th Nov, 2023, similar to other refresher / orientation courses.

F.No. AICTE / RIFD / FDP through MOOCs / 2023

VIGNAN'S INSTITUTE OF ENGINEERING FOR WOMEN (AUTONOMOUS)

(Approved by AICTE & Affiliated to JNTU-GV) Accredited by **NAAC** with 'A+' Grade NBA For UG Programmes of EEE, ECE, CSE & IT
Kapujaggarajupeta, Visakhapatnam

Certification of Participation

INTELLIGENT TECHNOLOGIES AND COMPUTING PARADIGMS FOR THE FUTURE

This is to certify that.....

Jothsna Kunche

from.....
18th August to 24th August 2025

has completed One Week International Short Term Training Program-(ISTTP) on **INTELLIGENT TECHNOLOGIES AND COMPUTING PARADIGMS FOR THE FUTURE** organized by the Department of Computer Science & Engineering and Information Technology, Vignan's Institute of Engineering for Women (A), Visakhapatnam.
